IV ADMINISTRATION SET ENHANCEMENT SEPTEMBER 2003 (01)

ALARIS Medical Systems Inc. announces a product enhancement to some IV Administration sets—an upgrade to the current VersaSafe® Injection Site.

The new injection site will have the same functionality as the current injection site and will accept both blunt cannulas and also needles (if necessary).

The only visual difference is that the band around the septum is more of a clear color rather than the white color that it is on the current injection site.

We will distribute the enhanced product when we deplete our current product supply.

The two IV Administration Sets that will have this product enhancement are:

IV ADMIN SET ALARIS SET IV ADMIN 2126

Item #: 01089
Unit of Issue: Each

IV ADMIN SET BLOOD SET IV ADMIN BLOOD

Item #: 01156
Unit of Issue: Each

**** Pyxis supply changes: nurse managers email request to Raymond Spencer & email copy to Paula Wrenn.**
